

RT1 Solid

TEMPERATURE RECORDER RT1 SOLID IP65

KEY FEATURES

- Wi-Fi communication
- Durable, hermetic housing
- RTD/ PT100 temperature sensors
- External temperature sensor
- Long-lasting battery (up to a year of use)

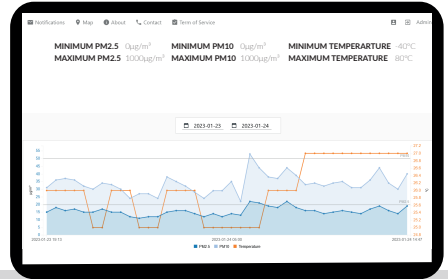

RT1 SOLID is a wireless digital temperature meter/recorder with a monitor sensor that communicates with the Internet via Wi-Fi. A device that allows you to view the measured parameters and access data on an ongoing basis via a mobile application and the iPomiar.pl platform. Encrypted measurement data is sent to an individual customer account that can be accessed from anywhere in the world. Thanks to the developed design, the device is able to operate on battery power for up to a year, which allows for very quick installation and maintenance-free operation.

DESCRIPTION OF THE SYSTEM

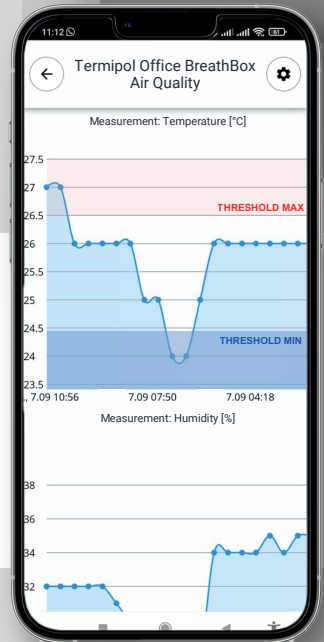

Isensum.com is a service that connects the user to a sensor anywhere in the world. With the help of the service, it is possible to collect data from measuring devices connected directly to the internet. Access to data and product configuration is possible via a web browser or phone and a dedicated mobile application. Additionally, using ipomiar.pl, it is possible to generate reports which, in a simple and accessible manner, illustrate the collected data in a user-defined time interval.
